Online certificate course

Agile Project Manager (AHK)

Succesfully managing complex projects with modern methods

Who is this course for?

This certification course is designed for **project managers, consultants, and executives** who want to integrate agile methods into their workflow. It is ideal for anyone looking to manage projects more flexibly, efficiently, and customer-oriented.
Please note: Proficiency in English is required as the course is held in English.

Why Agile Project Managers?

- They design projects adaptively and iteratively to develop market-ready products and solutions more quickly.
- They promote an agile mindset and increase the responsiveness of companies.
- They leverage agile methods for effective collaboration in dynamic teams.
- They strengthen agile leadership and change management skills to drive sustainable transformation.

Online certificate course

- Centralised implementation with experienced online trainers
- Varied blended learning concept for optimal learning success
- AHK certificate (in German and English) incl. digital AHK badge for social media profiles, eMail signature, etc.

Registration

Please register via your AHK.

Technical requirements: Up-to-date operating system with soundcard/sound output and connection for headset // headphones with microphone (headset), webcam // Internet access with min. 0.6 Mbps downstream and at least 1 Mbps upstream (can be verified in the router or under Settings/Network Speed) // Up-to-date version of an HTML5 browser (e.g. Chrome, Firefox) // Included in the course: Exercises that are carried out with an analytics platform and a BI tool. A download (free of charge) is required to use both applications. A Microsoft environment is required for the BI tool. Mac users need to install a virtual environment. // **Participants can access the virtual classroom via a link.**

Privacy information: In accordance with the requirements of the applicable data protection provisions, the AHK stores and processes personal data required for registration in accordance with the requirements of applicable data protection regulations. This data is disclosed to service providers of the organisation solely for the purpose of conducting online training.

Learning Format and Scope

- **Live Online Training:** Approx. 52 hours of interactive online training with experienced instructors
- **Self-paced Study:** Additional approx. 20 hours for independent in-depth learning
- **Practical Project:** Development, presentation, and discussion of an agile project
- **AHK Certificate:** Awarded upon successful completion of the online test

Fundamentals of Agility and Agile Leadership	• Agile mindset and principles • Agility at the individual, team, and organizational levels • Differences between traditional and agile project management • Leadership in agile environments: roles, responsibilities, and collaboration • Change management and cultural transformation in organizations
Agile Methods and Frameworks	• Scrum, Kanban, SAFe & Co.: principles, roles, artifacts • Iterative planning and incremental development • Visualization as a success factor
Customer-Centricity and Innovation	• Design Thinking: creative problem-solving and user-centric work • Lean Startup: idea validation and rapid experimentation • Value Streams and Business Agility
Agile Project Management in Practice	• Adaptive planning and agile control • Backlog prioritization and agile estimation techniques • Hybrid project approaches (combining agile & traditional methods) • Agile contracting and governance
Collaboration, Communication and Psychological Safety	• Key success factors for agile teams • Feedback culture and retrospectives • Agile meeting formats and facilitation • Building psychological safety in teams • Conflict management in agile environments
